Congregate Living
Information Sheet

Overview

The Congregate Living Building has been added to the Town of Enfield Network. The Social Services staff at Congregate Living is now able to utilize the Town email system, save files to a server that is backed up nightly, share files with Social Services staff at different locations, view the Town of Enfield Intranet, access the internet, and use available network printing resources.

Network accessibility also provides the IT Department with a greater level of management of the computer equipment on-site at Congregate Living. The IT Department has the ability to manage computers remotely; allowing updates of virus software and important operating system patches to protect computers from malicious attacks.

Highlights

- Connection of Congregate Living Building to Town Network
- Improved communication and efficiency for Social Services Staff
- Files stored on the network are backed up nightly

Interaction with Other Systems

- The staff at Congregate Living has access to Town network resources for email, file sharing, printing and Intranet information.
- Access to the internet is now available to staff at Congregate Living.
